

**Visual Basic** is the most productive tool for creating fast business solutions for Windows and the Web. A comprehensive, rapid application development environment, Visual Basic helps developers quickly create and deploy client/server applications, and program easily for the Internet using familiar Visual Basic programming tools and techniques.

- Simplify programming with COM+, and build distributed applications with built-in load balancing, transaction support, message queuing, object pooling, security, and integrated component management services.
- Make your applications and components thread-safe without the rigors of manual thread management.
- Quickly develop rich data forms, or use the new integrated Report Writer to develop sophisticated, hierarchical reports, all with drag-and-drop ease.
- Build Web applications and components running on Microsoft Internet Information Server that are accessible from any browser on any platform.

Plus much more ... **Are you gaining the benefits that Visual Basic has to offer?**

A-Certif Ltd provides Visual Basic training courses at many levels from **programming introduction to distributed application development**, and for all versions of Visual Basic. Our experienced trainers are knowledgeable and friendly and will answer all your questions and make sure you are happy with every topic that you need to cover.

We offer **public courses** which have a standard content and take place at scheduled times. Alternatively we provide **private courses** which can be tailored to suit your particular learning requirements and delivered when and where you want them.
